

## **LISTING OF THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Original) A culinary peeler having an elongate blade bent or curved in its lateral dimension having at least one longitudinal opening extending along its length with a sharp cutting region adjacent the opening, wherein the blade is of curved form in its longitudinal direction.
2. (Original) A culinary peeler according to Claim 1 wherein the blade has one longitudinal opening with a pair of opposed sharp cutting regions on opposite sides of the opening.
3. (Original) A culinary peeler according to Claim 1 wherein the radius of curvature of the blade in the longitudinal direction is in the range of 30 to 150mm.
4. (Currently Amended) A culinary peeler according to Claims 1 wherein the blade has a radius of curvature in the longitudinal direction of about 100mm.
5. (Original) A culinary peeler according to Claim 1 wherein the blade has a curved form with a lateral curvature of radius in the range of 3 to 20mm.
6. (Currently Amended) A culinary peeler according to ~~any preceding~~ Claim 1 wherein the blade has a lateral curvature of radius of about 7mm.
7. (Original) A culinary peeler according to Claim 2 wherein the blade is pivotably secured at its opposite ends to allow a limited pivoting about its longitudinal axis.
8. (Original) A culinary peeler according to Claim 7 having a handle and a planar blade support extending therefrom wherein the blade is constrained to allow pivoting from a first

position where one limb of the blade on one side of the longitudinal opening lies coplanar with and abutting the blade support, and a second position where the opposite limb lies coplanar with and abutting the blade support.

9. (New) A culinary peeler according to Claim 2 wherein the blade has a lateral curvature of radius of about 7mm.

10. (New) A culinary peeler according to Claim 3 wherein the blade has a lateral curvature of radius of about 7mm.

11. (New) A culinary peeler according to Claim 4 wherein the blade has a lateral curvature of radius of about 7mm.

12. (New) A culinary peeler according to Claim 5 wherein the blade has a lateral curvature of radius of about 7mm.
